PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of professional experience specializing in scalable web applications and high-performance APIs. Expertise in Node.js, Next.js, React, and database optimization with a proven track record in leading backend architecture, implementing authentication systems, and delivering mission-critical features. Strong problem solver with extensive experience in API development, third-party integrations, payment systems, and data pipeline automation.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript, React.js, Next.js, Material-UI (MUI), Responsive Design

Backend: Node.js, C, C++, DSA, Python, Java, RESTful APIs

Database & ORM: PostgreSQL, MySQL, Prisma ORM, Table-Valued Functions (TVF),

Tools & Technologies: Git, GitHub, Redis, Typesense, Auth0, Stripe, SendGrid, AWS S3, DynamoDB, Apache Airflow

Authentication & Security: Auth0, JWT, OAuth 2.0, Device Token, Basic Auth, RBAC

PROFESSIONAL EXPERIENCE

Full Stack Developer | Coditude Private Limited, Pune

February 2024 – Present

Project: Solohub | Tech Stack: Next.js, React.js, Prisma ORM, PostgreSQL, Auth0, Stripe, SendGrid

- Led backend development for a multi-tenant SaaS platform, establishing the core architecture and implementing scalable API solutions
- Built complete authentication system with Auth0 including universal login, single sign-on, and organization-based role management
- Created secure public and private APIs with multiple authentication methods including OAuth tokens, device tokens, and basic auth
- Developed model discovery feature that tracks user interests and sorts content by date for personalized recommendations
- Implemented team collaboration features including member invitations and organization access management
- Integrated Stripe for payment processing with subscription billing and webhook handlers
- Set up SendGrid for transactional emails and marketing automation campaigns
- Optimized database performance using table-valued functions in PostgreSQL for faster data retrieval

Project: Vidya Yoga | Tech Stack: Next.js, React.js, Prisma ORM, PostgreSQL, SendGrid

- Optimized all APIs across the application, improving response times by 40%
- Built payment processing features with secure transaction handling and verification
- Created reusable service functions that reduced development time by 30% and improved code maintainability
- Set up SendGrid email marketing automation for user engagement campaigns
- Wrote table-valued functions in PostgreSQL for complex data aggregations and reporting

Project: PMS (Property Management System) Data Pipeline | Tech Stack: Python, AWS S3, DynamoDB, Apache Airflow

- Built automated ETL pipeline for processing large-scale property management data
- Wrote Python scripts to extract data from CSV files, handle password-protected ZIP files, and validate checksums
- Set up secure file uploads to AWS S3 with automated metadata storage in DynamoDB
- Used Apache Airflow to orchestrate workflows including file retrieval, validation, and staging table transfers
- Ensured data quality through checksum verification and schema validation at multiple stages

Project: CarEdge | Tech Stack: Next.js, Node.js, MikroORM, Redis, TVF (SQL), Typesense, AJV Schema

- Built high-performance APIs for car search functionality handling thousands of concurrent users
- Integrated Typesense search engine for fast full-text search with fuzzy matching across large datasets
- Implemented Redis caching that reduced database load by 60% and improved response times to under 100ms
- Used table-valued functions in SQL for optimized complex queries and efficient data aggregation
- Added AJV Schema validation for input validation and data integrity

Project: Reviewer | Tech Stack: Node.js, Next.js, Material-UI, Prisma ORM, PostgreSQL, RTK Query

- Created APIs for trainee internship record management system
- Used RTK Query for efficient API state management and automatic data caching
- Integrated Trello, GitHub, and Microsoft Teams APIs for team collaboration and workflow automation
- Built responsive UI components with Material-UI ensuring cross-browser compatibility

EDUCATION

Master of Science in Computer Science | 80.00%

Modern Education Society's Nowrosjee Wadia College, Pune

September 2022 – April 2024

Bachelor of Science in Computer Science | 93.86%

Shri Saibaba College, Shirdi

June 2019 – April 2022

ACADEMIC PROJECTS

Online Examination System | Java, Swing, MySQL

- Built secure examination platform with student login, timed tests, and automated certificate generation
- Designed database schema for storing users, questions, answers, and results

Hotel Management System | Java, Swing, MySQL

- Created hotel booking system for AC and Non-AC rooms with real-time availability
- Implemented automated billing and customer history tracking

CERTIFICATIONS

- **Data Structures & Algorithms with Java** – Apna College (August 2023 – December 2023)
- **Python for Machine Learning & Data Science** – Udemy (2022)
- **Data Structures and Algorithms** – Bitamin (March 2021)

ACHIEVEMENTS & AWARDS

- **Hack in the Dark Winner** – Modern College, Pune (February 2024)
- **Wisdom War Champion** – Modern College, Pune (February 2024)
- **Blind Coding Winner** – Modern College, Pune (March 2023)
- **Ramanujan Math Quiz Winner** – Saibaba College, Shirdi (December 2020)
- **Ideal Student Award** – 12th Standard (2018–2019)
